

Meeting 5 - April 6, 2022

- Likes the process and data capture
- John would like to see a piece for returning users (we only have the part for new users)
- John wants to know if we have validation around real user email addresses (we currently don't but we should look into this)
- John asked something about what plugins would we have used if we had the budget
 - This turned into a conversation about the system's longevity and Eric suggested looking into making a standalone website without relying on WordPress if the Food Bank is looking into a long term solution
